

Mortality Devoid of Morality — One Sheet

Logline

A culture targets the faithful and survival means mercy, courage, and hard choices as keeping faith becomes resistance.

Description

Mortality Devoid of Morality is a Christian dystopian novel built from history, Scripture, and my imagination. The faithful are hunted, and forgetting the past opens the door to worse. The story looks straight at good and evil and at what people do to each other. It follows those who stand, protect the weak, and keep faith when it costs them. It is about strength, mercy, honesty, and caring for one another. I wrote it as a warning and a call to remember the past, tell the truth, and hold to the faith in a time that would rather you did not. It draws from lived history, witness, and Scripture to keep the story grounded and honest for today's reader everywhere.

Author Bio

Adi Michelle Rutler is a Catholic novelist and chef. She is a wife, a mother of five, and a grandmother. She lives in California. Her path back to faith shapes her work. As a child she was rescued from abuse and raised Catholic by an adoptive family who taught her about God's love. After bad decisions led her away from her family and the faith, she later returned to the Catholic Church. History and Scripture became the ground she writes from.

Her Christian dystopian novel, **Mortality Devoid of Morality**, is built from history, Scripture, and imagination. The book looks straight at good and evil and at what people do to each other. It follows people who stand, protect the weak, and keep faith when it costs them. The stakes are real and choices have consequences. Themes of strength, mercy, honesty, and caring for one another run through the pages.

She shares updates at adimichellerutler.com and on her social media. She answers readers in comments and is available for interviews, book clubs, and event invitations.
